PayHero makes payday super easy with automatic calculation of employee pay and holidays from online timesheets and work patterns. Your clients can be confident they're complying with the Holidays Act because PayHero stores leave balances in Weeks and reviews employees' recent work patterns when evaluating leave.

Better yet, the key elements that feed into payroll are all included - online and mobile employee timesheets; leave management; zero touch payday filing; expense claims and reimbursements; and deep integration with Xero so you can easily assign payroll costs to the general ledger and tracking categories.
